

# Come

James Mark Gulley

*Verse:*

                  G  
When you walk into the room I can feel You  
  
So I open the door of my heart  
                  C                                  G  
You can have it all You can have it all  
  
And every time we're singing all about You  
  
Your presence is filling the room  
                  C                                  G  
All the angels fall and all the angels fall

*Pre-Chorus:*

                  C                                  G/B  
Singing Holy holy are You Lord  
                  C                                  D  
You're the One we're waiting for

*Chorus:*

                  G  
Come - You give hope to the hopeless  
                  D                                  Em  
Come - You give life to the broken ones  
  D  
There is not another like You in all of our lives so  
                  G  
Come - hear our hearts yearning  
                  D                                  Em  
Come - we are the burning ones  
  D  
There is not another like You there is not another

*Bridge:*

                  G                                  Em  
Like You always do and like You never have before  
                  G                                  D  
God fill up this room You can have it all
